

BIOTAB

BIOTIN

Compositions:

Each tablet contains Biotin BP 5000 mcg.

Pharmacology:

Biotin also known as vitamin B7 or vitamin H is a water-soluble vitamin that serves as an essential cofactor for carboxylase enzymes in multiple metabolic pathways. Biotin promotes good skin health, and it helps to regulate your bad cholesterol (LDL) and blood sugar. Biotin is also necessary to produce keratin, a protein that promotes strong nails and hair

Dosage And Administration:

Generally, 1-2 tablets per day or as advised by the physician.

Contraindications:

Known hypersensitivity to any of the ingredients.

Warning And Precaution:

N/A

Side Effects:

Well tolerated in the recommended dose. No Biotin toxicity has been reported in individuals supplemented with as much as 200 mg orally or 20 mg intravenously per day.

Use in Pregnancy and Lactation:

Sufficient clinical data is not available to use in pregnant women and lactating mother.

Drug Interaction:

Anticonvulsant drugs may lower the plasma level of Biotin. Antibiotics may decrease the Biotin contribution to the body.

Overdosage:

N/A
