

SINASOY

FERMENTED SOY

Compositions:

Sinasoy 500 mg Tablet: Each film-coated tablet contains 500 mg Fermented Soy, fermented by *Lactobacillus delbrueckii*.

Pharmacology:

Fermented Soy is a natural dietary supplement made from Soybeans that has been fermented by *Lactobacillus delbrueckii* strains of bacteria. It is an effective natural alternative for treating heartburn and stomach discomfort. Fermented Soy stimulates appetite, alleviates nausea, vomiting and acid reflux. It also heals gastric mucosa and minimizes the occurrence of stomach irritation. Bioactive components Fermented Soy can alleviate gastrointestinal pain and provide immediate relief from occasional heartburn. Because of the high concentration of proteins or metabolites in Fermented Soy, it exerts a buffering effect on stomach pH. Fermented Soy produces anti-nutritional peptides that block the function of protease enzymes in the stomach, thereby defending the gastric epithelium. As a result, tissue deterioration is instantly stopped, and gastrointestinal discomfort is diminished. Additionally, it slows down the expression of cytokines that promote inflammation, aiding in the healing of stomach ulcers. Fermented Soy eases the discomfort of indigestion.

Dosage And Administration:

1-2 Tablets 3 times daily or as advised by the physician

Contraindications:

undefined

Warning And Precaution:

undefined

Side Effects:

Well tolerated in recommended dose

Use in Pregnancy and Lactation:

There are not enough clinical data to use on pregnant and nursing mothers

Drug Interaction:

Monoamine oxidase inhibitors may cause drug interactions

Overdosage:

undefined

Storage:

Keep away from light, store in cool (below 30° C temperature) & dry place. Keep out of the reach of children

Packing:

Sinasoy 500 mg Tablet: Each box contains 3x10 Tablets in Alu-Alu blister pack

Manufactured By:

The IBN SINA Pharmaceutical Industry PLC.

Shafipur, Gazipur, Bangladesh.
