

CURCUMIN

CURCUMINOIDS

Compositions:

Each tablet contains Curcuminoids USP (Curcuma longa) 500 mg.

Pharmacology:

Curcumin, the principle component of turmeric, is a natural anti-inflammatory agent that has been used for treating inflammatory related medical conditions for many years. Turmeric has strong Anti-inflammatory, Antioxidant and Antimicrobial properties. It is used to treat Gastrointestinal disorders, e.g. Dyspepsia, Helicobacter pylori infection, Flatulence, Colic, Irritable bowel syndrome and Crohn's disease. The active constituents of Curcuma longa are the flavonoid curcumin and various volatile oils including Tumerone, Atlantone and Zingiberone. Curcumin exhibits stronger antioxidant activity compared to vitamin C and E.
